

FUTURES EDUCATION: World Yearbook of Education 1998

David Hicks & Richard Slaughter (eds)
Kogan Page, 1998

In this key text distinguished international writers elaborate on three main themes - Part 1 explores the nature of the futures field and the extensive knowledge base of futures studies; Part 2 offers a wide range of illustrative case studies from schools, higher education and teacher education; Part 3 focuses on further innovative work emanating from the USA, Australia and the UK. Futures education has a pivotal role to play in the process of societal recovery and renewal and this essential dimension of the curriculum can empower students to become more critical, creative and reflective global citizens.
